OpenSites Hosting - Level 3		£140
Notes		
<p>1. The Minimum Hosting Level refers to the lowest Hosting Plan required to host an OpenSites website with Integresis. To determine the Hosting Plan you require for any site, simply pick the highest level of any of the chosen site modules. Please note the Hosting Plans are designed to provide ample web space, bandwidth and database space for typical websites with the selected modules. Sites with very large amounts of uploaded content, or very high traffic levels, may require a Hosting Plan above the Minimum Hosting Level indicated, and/or additional webspace or bandwidth. Please see the Hosting Matrix for further information.</p> <p>2. The charge for the OpenSites Engine - required for each website - is £200. This charge is waived for sites hosted with Integresis. Should a site be launched at Integresis and subsequently transferred to another host, the OpenSites Engine fee will be payable before the site is transferred.</p> <p>3. Included / Additional Pages are individual content pages, created and managed through OpenSites. Many modules - such as the FAQ or Virtual Catalogue modules, for example - spawn multiple pages in response to website users browsing their content. These are not chargeable as Additional Pages - only the page (or pages) in which the module is inserted count towards the limit of Included / Additional Pages.</p>		
All prices exclude VAT at Standard Rate (17.5%)		Effective 25 February 2008 E&OE.

OpenSites is a proven Professional Website Development Platform, with thousands of sites launched each year since 2002.
